Logistics Support

TASK ORDER 00 19 F 3 3 4 5 7 - 97 - D - 2007

## 1.0 PURPOSE

Provide acquisition logistics support services to the B-2 System Program Office (SPO) ASC/YS.

#### 2.0 SCOPE

This effort primarily involves the functional elements as identified under the basic contract Statement of Objectives (SOO) under paragraphs: 4.1 Integration of Maintenance Planning (MP); 4.4 Integration of Support Equipment (SE); 4.5 Integration of Technical Data (TD); 4.11.4 and Warranties for acquisition logistics contract support. The tasks to be accomplished also include Change Proposal and Document Evaluation as well as the Definition of New Requirements. This task order describes the tasks to be performed in support of the B-2 Program. NO ENGINEERING SUPPORT WILL BE PROVIDED UNDER THIS TASK ORDER BY THE CONTRACTOR.

## 3.0 RESPONSIBILITIES

The Integrated Product Team (IPT) Leads, Air Vehicle Team (ASC/YSA) and Production (ASC/YSB) are responsible for the technical liaison, review, approval, and final acceptance of efforts accomplished under this task order.

# 4.0 WORK TO BE ACCOMPLISHED

The contractor shall perform the following tasks in accordance with this task order, the Contract Data Requirements List (CDRL) and the contract (DI-ADMN-81373/T, SEQ A0001; DI-MGMT-80368/T, SEQ A002; DI-ADMN-80447, SEQ A003; DI-MISC-80508/T, SEQ A004).

# 4.1 Logistics Support Tasks

The contractor shall provide acquisition logistics support to assist in ensuring that the established objectives and procedures are complied with for acquisition and fielding of the B-2

weapon system. The contractor shall gather program data, perform analyses and provide recommendations to satisfy the specific objectives of this order. All tasks will be documented and coordinated with the appropriate task monitor. The contractor shall prepare for and participate in reviews, meetings and/or working groups which may be required to support this task order, including providing assistance in accomplishing all required coordination between government and weapon system contractor participants relating to logistics programs and requirements. The contractor shall assign personnel possessing the breadth and depth of experience, knowledge of Government program objectives and mission requirements that will enable them to perform independently.

- 4.1.1 <u>Integration of Maintenance Planning (MP).</u> Provide maintenance planning for aircraft and equipment acquisition as follows:
- a. Assist the IPT lead (YSB/YSA), and in conjunction with the using command and support Air Logistics Center (ALC), monitor all maintenance planning activities related to field support.
- b. Identify impacts on maintenance planning and established organic maintenance capability.
- c. The contractor shall support the B-2 system and equipment modification/retrofit requirements by providing technical expertise in the evaluation of retrofit plans. This evaluation shall include researching specific TOs and recommending corrective action.
- 4.1.2 <u>Integration of Support Equipment (SE)</u>. Perform logistics support for SE by reviewing and assessing the SE programs to ensure proper SE is available by the need date.
- 4.1.3 <u>Integration of Technical Data (TD).</u> The contractor shall provide logistics support for the acquisition and sustainment of technical data. This shall consist of providing a level of expertise and competency as related to the development and refinement of customer technical order (TO) and Time Compliance Technical Order (TCTO) requirements and the preparation of draft contractual requirements. This shall include assisting in, preparation of, and conducting TO conferences.
- 4.1.4 <u>Warranties.</u> Perform warranty technical and management support to include but not be limited to:
- a. Review of legal, regulatory, and contractual requirements pertaining to the B-2 weapon system warranty.
- b. Evaluate proposed changes to the contract and assess any potential impact they may have on the warranty.

- c. Provide technical and management assistance for implementation and administration of the warranty and any changes thereto including participating in warranty planning team meetings, preparation of draft updates to the weapon system warranty plan, warranty implementation plan and warranty handbooks.
- d. Develop a B-2 warranty database to be used to facilitate the management and administration of the warranty program.
- e. Analyze maintenance data resulting from organic or ICS repairs made to warranted items during the warranty period to ascertain whether or not the terms of warranty apply. The analysis performed shall be used to determine whether or not the cost of the repair should be covered under provisions prescribed in the B-2 contract warranty clause. The contractor shall research data required to accomplish these requirements from any approved source.
- 4.1.5 Change Proposal and Document Evaluation: The contractor shall evaluate all change proposals, draft directives, military specifications and standards for logistics program impacts resulting from each proposed change. As a minimum, this evaluation shall ensure the following: all logistics elements have been considered in each proposal; the proposed coverage is adequate and suitable; omission of necessary coverage has been determined; duplications of coverage has been noted; warranty has been considered; proposed delivery schedules have been developed; and an analysis of proposed cost has been performed. Reports and meeting charts (CCB, etc.) shall be provided as required at time of tasking.
- 4.1.6 <u>Definition of New Requirements</u>: The contractor shall provide acquisition logistics support and expertise in the definition of new logistics requirements for the B-2 weapon system and equipment which may arise from time to time.

## 4.2 Review Participation

As required under paragraph 4.0, the support contractor shall attend program reviews and provide technical assessments of action items with respect to logistics requirements. The support contractor shall develop summary information on the activities, action items, conclusions and recommendations related to meetings, reviews and audits.

# 4.3 Travel

Travel to contractors' plants, USAF bases or other designated areas will be performed as required by ASC/YSB and ASC/YSA.

# 5.0 REPORTS/DATA AND OTHER DELIVERABLES

All data/reports and deliverables shall be delivered in accordance with the Contracts Data Requirements List (CDRL) DD Forms 1423. The contractor shall document all completed effort/accomplishments in a final report.

## 6.0 GENERAL INFORMATION

## 6.1 Work Location

Accomplishment of tasks required by paragraph 4 above requires work in the B-2 System Program Office (SPO) located at Wright- Patterson Air Force Base, Ohio and at various contractor, subcontractor and Air Force facilities located throughout the continental United States. All administrative support shall be the responsibility of the contractor.

# 6.2 Contractor Relationships/Supervision

In interactions and dealings with system contractors/subcontractors, the contractor shall perform work for investigation purposes only. The contractor shall not provide direction nor otherwise interject into Government/system contractor/subcontractor relationships. Contractor personnel shall not be under the direct supervision of Air Force personnel.

## 6.3 Security Classification

The B-2 operates in a "Special Access Required" environment. All personnel assigned to the B-2 program must be "Accessed" and obtain a SECRET security clearance. Acceptance of personnel for initial assignment requires a SECRET security clearance and must meet program access criteria. Failure to achieve program access or a secret security clearance will result in withdrawal of this task order.

ATCH 2 PAGE 3 of 4

# SPECIAL CONSIDERATIONS (AFSSM 7011 EXTRACT)

- 3.5. Special Items. People may innocently introduce other radio devices, such as pagers, hand-held portable transceiver radios, cellular telephones, cordless telephones, and cordless microphones into the area processing classified national security information with disastrous results. Also, alarm systems may use radio transmitters to alert remotely located security or fire-fighting teams.
- 3.5.1. Hand-Held Radios. Hand-held radio transceivers used with intrabase radios (sometimes abbreviated IBR) and land mobile radios (sometimes abbreviated LMR) deserve special consideration because of their unique operational applications. A person may carry these devices into an area where classified national security information is processed. If the person carrying such a device works in the facility, either turn off the device and use the telephone or separate it 2 meters from classified processors: no transmissions are allowed. If the person carrying the device is a short-term visitor, it is not necessary to turn off the radio because the visitor usually moves about in the facility. Infrequent transmissions are allowed, but only for short durations.
- 3.52. Beepers and Pagers. Beepers and pagers deserve special consideration because of their unique operational applications. A person may carry these devices into an area where classified national security information is processed. If the person carrying such a device works in the facility, either turn off the device and use the telephone or keep the device 2 meters from classified processors. If the person carrying the device is a short-term visitor, it is not necessary to turn off the device because the visitor usually moves about in the facility. If the device has a transmit capability, follow the instructions for hand-held radios.
- 3.5.3. Alarm Systems. The mode of operation of alarm systems radio frequency transmitters will determine their treatment. Any such transmitter with a continuous transmit mode or a high duty cycle (transmits most of the time) must meet the same separation requirements as all other fixed transmitters. If they do not meet these requirements, exclude them from operating in the classified national security information processing area. Low duty cycle (transmits short bursts infrequently) systems are not considered hazards and require: a special treatment.
- 3.5.4. Cellular Telephones. When a cellular telephone is used as an operational necessity separate it 5 meters from RED equipment. When the cellular telephone is a personal asset, its use is prohibited. Disable the unit from receiving calls or separate it 10 meters from RED processors.
- 3.5.5. Cordless Telephones. When a radio frequency cordless telephone is used as an operational necessity, separate it 5 meters from RED equipment. When the cordless telephone is a personal asset, its use is prohibited. Disable the personal cordless telephone from receiving calls or separate it 10 meters from RED processors. There are no separation requirements for infrared cordless telephones.

# 3.5.6. Cordless Microphones.

- 3.5.6.1. Radio Frequency Cordless Microphones. When a radio frequency cordless microphone, encrypted or unencrypted, is used for briefing either classified national security information or unclassified information, separate it 10 meters from RED equipment. Using unencrypted radio frequency cordless microphones for classified briefings is prohibited.
- 3.5.6.2. Infrared Cordless Microphones. Using an infrared cordless microphone for briefing classified national security information requires a closed room: keep the doors closed and cover the windows with drapes.
- 3.5.7. Cordless Keyboards. When a radio frequency cordless keyboard is used, separate it 10 meters from RED equipment. Radio frequency cordless keyboards cannot be used to process classified national security information unless encrypted.
- 3.5.8 Wireless Local Area Networks. When a radio frequency wireless local area network is used, separate the transmitter and receiver units 10 meters from RED equipment.

The complete document can be obtained from the Air Force Information Protection Home Page (http://www.afca.scott.af.mil/gc/gci/).

# NOTIFICATION OF GOVERNMENT SECURITY ACTIVITY

- 1. Thirty days before the date Contractor operations will begin on Wright-Patterson AFB OH, the Contractor shall provide ASC/SYSPC, 1801 Tenth Street, WPAFB, OH 45433-7625 the following information:
- a. The name, address, and telephone number of your company's Facility Security Officer and your designated on-site security representative;
  - b. The contract number and military contracting command;
- c. The highest classification category of defense information to which Contractor employees will have access;
  - d. The date Contractor operations will begin on WPAFB OH;
  - e. The estimated completion date of operations on WPAFB OH;
- 2. This requirement is in addition to visit request notification procedures contained in DoD 5220.22M, National Industrial Security Program Operating Manual, Chapter 6.
